02.23.2011 17:09

A photograph of a concrete road surface. A white painted line runs horizontally across the middle of the frame. Above this line, there is a blue and white striped object, possibly a surveying tool or a piece of equipment. Below the white line, there are red markings: a red arrow pointing upwards on the left, a red arrow pointing upwards on the right, and the text "M-II-1" in the center. A vertical crack runs down the center of the road, passing through the white line and the red markings. The concrete surface shows signs of wear and aging.

02.23.2011 17:09

A photograph of a concrete road surface. A white line runs horizontally across the middle of the frame. Below the line, there is a vertical crack in the concrete. To the right of the crack, the text "M-II-2" is painted in red. Above the crack, there is a red arrow pointing upwards. The concrete surface has a textured, grooved appearance.
